

itrust consulting is a Luxembourg-based company that tailors information security to business requirements. Founded in 2007, it has grown continuously and today counts 18 employees working in the different fields of Consulting, Sourcing & Innovation, Audit & Hacking, Research & Development, and Training and Awareness.

Implementation of an Information Security Policy tool

The main document of an Information Security Management System is the Information Security Policy which includes the scope, strategy, main stakeholders, and business objectives of the ISMS to implement.

In order to help its customers to establish an Information Security Policy, itrust consulting would like to be able to generate an Information Security Policy including all its key-elements based on a predefined web-based model which considers the specific requirements of the target organisation.

Your mission:

- Analyse and extract key-elements of an Information Security Policy;
- Create a model of an Information Security Policy including previously identified key-elements;
- Develop a tool to generate an Information Security policy document based on the elements of a previously established knowledge-database.

Your profile:

- Bachelor student in computer science (or related field) looking for a 4 to 6 months internship in the private sector;
- Information Security Management System knowledge (ISO27001 – ISO27002);
- Knowledge of Java J2EE, MySQL;
- Optional: Spring 3 MVC, Spring security, Hibernate, HTML/jQuery;
- Good communication skills;
- Team player;
- Fluent in English and in French.

We offer you:

- Possible employment after internship;
- Paid internship;
- Possibility to work in a young, dynamic team in a multidisciplinary environment.
